FOR IMMEDIATE RELEASE

Nurse Assist Introduces New Digital FALLWatch II Wireless System

FORT WORTH, Texas - Nurse Assist, Inc., introduces the all-new digital RN+ FALLWatch II Wireless System to help hospitals, nursing homes and long-term care facilities prevent falls and injuries.

The FALLWatch II Wireless System brings all fall alarms to one location at the nurse's station. The dedicated wireless alarm system helps eliminate a selective or mistakenly prioritized response to the nurse call alarm by the caregiver. In addition, the new digital operation provides nurses enhanced, time-saving features and wireless programming.

The new FALLWatch II is now shipping.
